

Accounting

...a degree program for students interested in an accelerated format

Accountants play an integral role in all types of business, from non-profits to Wall Street financial firms. The accounting program at St. Scholastica provides exceptionally strong preparation for the CPA and CMA exams.

The accounting program provides a broad-based core of business-related courses including management, finance, marketing, computer science, economics, mathematics, statistics, and legal aspects of management. Students will also develop written and oral communication skills, learn to use electronic accounting applications, and complete a general education program in the liberal arts.

We offer both evening classes and online courses so you can choose the option that fits your schedule.
